if employing this method, i'd hold off fencing until the young would be old enough to exit without mamma's help

the narcotics will almost always be kept in the safe that exactly the pharmacist has usage of

but are not limited to: study design, year, setting, country, sample size, eligibility criteria, population

by comparison 'cowboy' is sometimes unfortunately used in a context that has absolutely nothing to do with cattle or the men who work them - instead inferring someone is incompetent or shifty.
